Introducing OtimSan

Otimsan was founded in 1962 by Altan Ozbudun Architect.

Otimsan makes design proposals to meet the needs of its customers. Products are constantly evolving and renewing ... It takes care to produce different products for each project. interior architecture and products designed to the texture of the structure are integrated with the space and add extra value.

our services,

1-Design

All complex directions / marking needs, traffic and circulation determinations, product designs, materials, colors, fonts, proportions, types, customs, lists, positioning etc. from wc pictogram to fire instruction to warehouse numbers in front of buildings to turn all the details into a directing project and production is our basic business.

2-Production

All the outdoor Signages in the roofs, facades and canopies

- manufacture and assembly of Signs.
- Totem and pedestal parking signs parking signs.
- internal signages

All the materials and measures you need for interior design, such as orientation, panel, sign, signage, warning sign etc... manufacture and assembly of products.

We are the solution partner of your signage package...

Introducing Personnel and Work Environment

Our project management team studies, plans, and organizes every single detail of each project to ensure its success from inception to completion. Through careful planning and studying of submittals, which include materials, shop drawings, methods of statement, as-built drawings, layouts, and 3rd party certificates, all projects are organized to ensure compliance to contract details and to establish the program of works. Along with planning, we also conduct site supervisions and implement safety plans to guarantee correct installation and proper safety measures for high-risk signs. In doing precise project management, we can guarantee quality, safe, and on-time completion of each project.
